

Microsoft Power Automate

Seamless Integration, Effortless Automation

Incorporate cloud technology, make automated workflows,
and build your solution using no-code techniques with
Microsoft Power Automate.

Let's Get Started!

What is Microsoft Power Automate?

Power Automate is an end-to-end automation solution that lets users automate processes using workflows without writing code. It solves the complex business challenges of establishing a connection between different solutions to automate the data flow.

Power Automate is one of the essential solutions available under the Microsoft Power Platform. All such solutions, like **Power BI** and Power pages, reduce operational costs and enable users to drive innovation in business processes with a low-code approach.

Power Automate Microsoft empowers users to:

- ✓ Build applications, forms and workflow
- ✓ Connect different complicated processes
- ✓ Perform task with a pre-built templates

Note: It was previously known as Microsoft Flow, but on November 4, 2019, Microsoft rebranded it as Microsoft Power Automate; one of the applications of the **Microsoft Power Platform** most business owners, consultants, and Dynamics  professionals still call it Flow.

Power Automate: Types of Flow to Suit all Needs

Microsoft Power Automate comes with three major flows to automate tasks and increase efficiency.

✓ Cloud Flows

Build an automation flow that can be triggered in three ways: instantly, automatically, and by scheduling.

✓ Desktop Flows

Build an automation flow to automate tasks on the desktop or the web.

✓ Business Process Flows

Build an automation flow to enable users to track their work during a business process while guiding them throughout the process until the work is complete.

Supercharge Productivity: Free Your Employees to Do What They Do Best

Microsoft 365 Power Automate is a very powerful solution that lets you automate workflows connecting different applications, sync data between apps or services, and send notifications to the user in real-time.

Also, it eliminates recurring and manual tasks, like approvals, data entry, generating reports, data transfer, and more, through automation capabilities, leading to enhanced efficiency.

You can automate the process of generating and sending invoices to the concerned person to save time and boost team productivity.

- ✓ Build workflows and connect different applications

- ✓ Eliminate recurring and manual tasks

- ✓ Automate generating and sending invoices

Improve Accuracy and Reduce Errors: Get Accurate Data on the Go

By automating workflows and business activities, you can reduce human intervention, which leads to fewer errors and enhanced data accuracy.

You can eliminate typos, miscalculations, and other errors with MS Power Automate to make the system smoother and more stable.

With this solution, you can easily automate the process of getting notifications in real-time, ensuring accurate data collection on time and making you aware of everything happening in your business.

✓ Reduce human intervention

✓ Enhanced data accuracy

✓ Automate business activities

Happy Customers, Happy Business: Power Up Your Customer Experience

Offer an exceptional level of customer satisfaction with Microsoft Power Automate. It lets you automate essential customer support services that include shipping, order confirmations, and personalized communications.

You can even set up an automated, tailored customer service experience using emails whenever a customer with a specific set of parameters approaches your business.

While using Power Automate at its fullest, automate the customer issue resolution of standard queries, leading to better customer satisfaction and time savings.

- ✓ Offer good customer satisfaction
- ✓ Automate customer support services
- ✓ Give tailored customer service experiences

Scale with Confidence: Automate for Growth, Not for Growth Pains

Expand your business capabilities with the growth of your business operations. Reduce manual tasks **with automation** to accelerate scalability and achieve targets.

Power Automate enables businesses to scale **or automate** various tasks without hampering their existing performance.

You can manage inventory, track resources, analyze data, build reports, and set up different forms of automation to meet fluctuating market demands.

✓ Accelerate scalability and achieve targets

✓ Enhance system performance

✓ Manage inventory and track resources

Microsoft Power Automate Features: Automate Your Business - like a Pro!

Microsoft Power Automation allows you to connect hundreds of **connectors to** make your business invulnerable to increasing business complexities **and** changing market demands. Along with these basic features, Power Automate Microsoft has a lot for your business.

Find Growth Opportunities

Optimize existing business processes and find more growth opportunities through automation and data mining.

Automate with Ease

Connect your system, services, and applications using workflows, apps, and websites with robotic process automation (RPA).

Total Visibility Across Business

Get a 360-degree view of your business with the embedded data security functionalities of Microsoft Power Automate.

Integration Made Simple

Integrate with other solutions in the [Microsoft Dynamics 365 ecosystem](#) and Power Platform with just a click, without writing code.

Leverage AI Capabilities

Utilize AI, BI, Microsoft Copilot, and embedded ChatGPT to get recommendations, automate repetitive tasks, and turn raw data into useful content.

Inbuilt RPA

Get a modern user interface for your legacy system with robotic process automation and scale or optimize resources in case of business loads.

Comes with DPA

Utilize digital process automation (DPA) to automate services or apps running on the cloud while collaborating with Microsoft Copilot.

Simplify Data Reporting and Analysis

Use pre-built templates to access data, eliminate business challenges, perform data analysis, and build reports integrating with Power BI.

Save Time and Automate Business with Microsoft Power Automate

Streamline business processes, connect different solutions, set up workflows to get notifications, and build solutions to enhance productivity with low-code or no-code.
